

Module 4 Route Planner

Plan and explain a three-step autonomous routine

Student: _____

Date: _____

Pathway: Code Learning / Robot Programming

Team: _____

Route Diagram

Mark the starting position, direction, distances, headings, mechanism actions, obstacles, and expected ending position.

Scale or field reference: _____

Movement Call Analysis

Call	Expected behavior	Argument explanation
move(100, 0, 8);		
turn(90, 6);		
move(50, 90, 6);		

Three-Step Autonomous Routine

Write at least one move(), one turn(), and one additional movement or mechanism action.

Prediction

Explain what the robot should do without running the program.

Review

Reviewer or demonstration observer: _____ Date: _____

Feedback and revision:
