

Module 6 Reliability Log

Classify failures, revise one cause, and compare repeated trials

Student: _____

Date: _____

Pathway: Code Learning / Robot Programming

Team: _____

Failure Categories

Configuration / Compilation / Control logic / Sensor / Mechanical / Starting-position / Battery or power / Unknown

Ten-Run Baseline

Run	Success ?	Ending error	Battery	Failure category	Notes
1					
2					
3					
4					
5					
6					
7					
8					
9					
10					

Baseline Summary

Success rate: _____ / 10 = _____ % Most frequent failure: _____

Evidence supporting that classification:

One Revision

Change made: _____

Why this change addresses the most frequent failure:

Five-Run Retest

Run	Success ?	Ending error	Battery	Failure category	Notes
1					
2					
3					
4					
5					

Comparison

Baseline success rate: _____ % Retest success rate: _____ % Difference: _____ percentage points

What improved, stayed the same, or became worse?

Why does one successful run not prove reliability?
